3" STEERING KIT *Ultimate*

A popular option is our 3 degree steering kit. This necessary change steering and lower manual to power steering by increasing forward rake 3 degrees. This kit includes designed for trikes, provides better "road feel" than steering kit designed for sidecars. It's well needed and does not require any fork tube or fork modification.

AMERICAN CUSTOM TRAILERS' NEW MODEL

American Custom Trailers, LLC. has done it again. They are introducing their third model (ACT-03). It's on the same platform as ACT-02 (the Mustang "likeness"). This model is not only sharp looking, but it's got a whopping 24 cubic feet of storage space! And it's hand-crafted and D.O.T. compliant. American Custom Trailers' motto is "Don't Settle For Ordinary." So why pull a box on wheels, when you can pull something that

RACK UP TRAILERS

RackUp Trailers, Inc.
www.rackuptrailers.com
 931-635-7645

Rack Up trailers are built differently. Starting with our frames. The frames are manufactured from high-quality aircraft aluminum and ride on independent air suspension. Our frames have been designed to allow different setups to lock onto the frame. One trailer now becomes many trailers. Simply removing four locking points and your trailer can go from a fiberglass color matched touring trailer (shown here) to a flatbed in a matter of minutes. See all the different setups and find out more at www.RackUpTrailers.com.

PRISM+ LED ACCENT LIGHTING SYSTEM

Kuryakyn
www.kuryakyn.com/c/prism
 866-277-9598

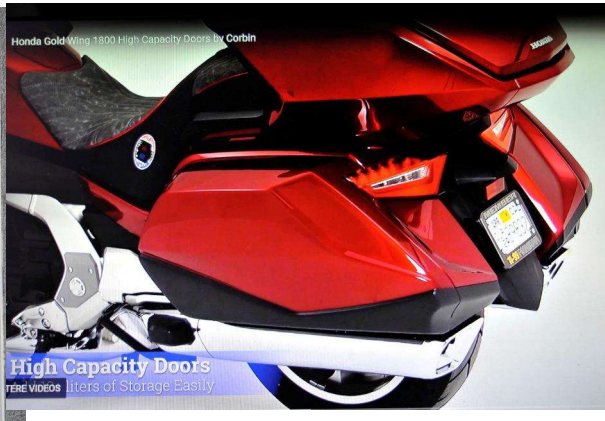

Prism+ Core, Impact, and Pro LED light kits offer all-inclusive accent lighting experiences for any motorcycle or vehicle operating via a 12V DC battery. And the expandable Prism+ LED network includes additional vehicle-mounted light accessories, as well as headlights and passing lamps that create a panoramic smart system all powered by the four-channel Prism+ Bluetooth controller. Through the Prism+ app, users can program millions of one-touch color options and utilize any of the four preset displays including "Ride" mode, which designates the front zones as static amber and the rear zones as static red auxiliary running lights, in addition to other on-road features. Plug-and-play installation with convenient "daisy chain" waterproof connectors allows easy expansion.
